

SUPPLEMENTS

The preparation of samples for studying neutrophils without their isolation

Natalia Fedorova, Alexey Sokolov, Alexander Trashkov, and Elena Varfolomeeva

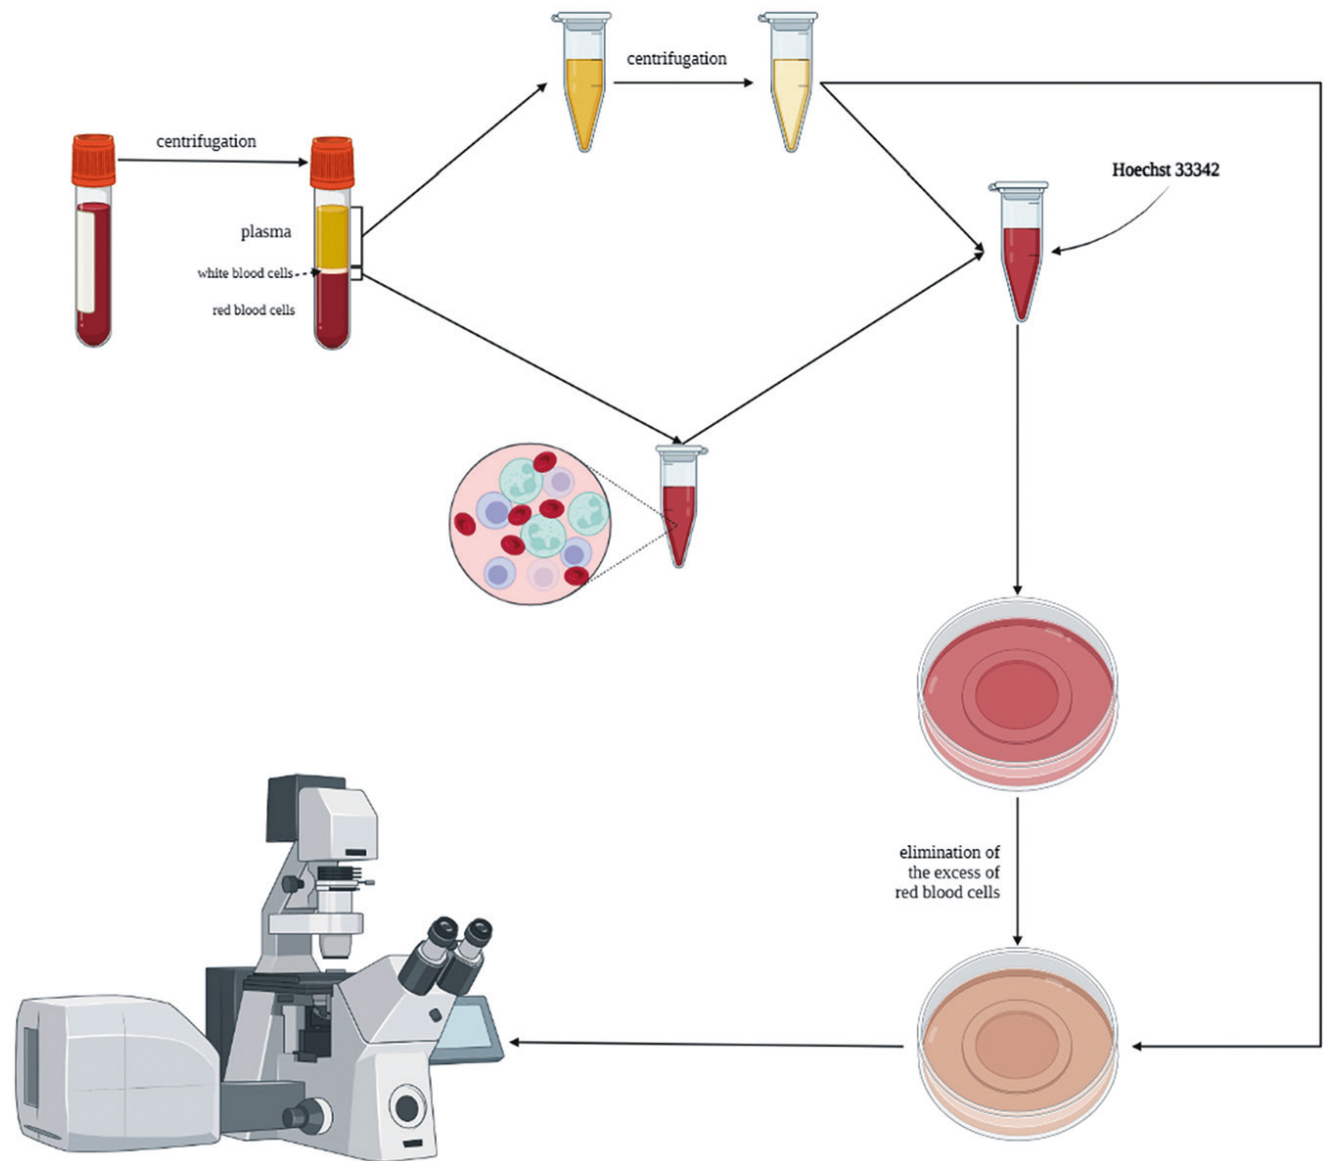

Fig. S1. The scheme of proposed protocol of preparation of samples for studying neutrophils without their isolation.

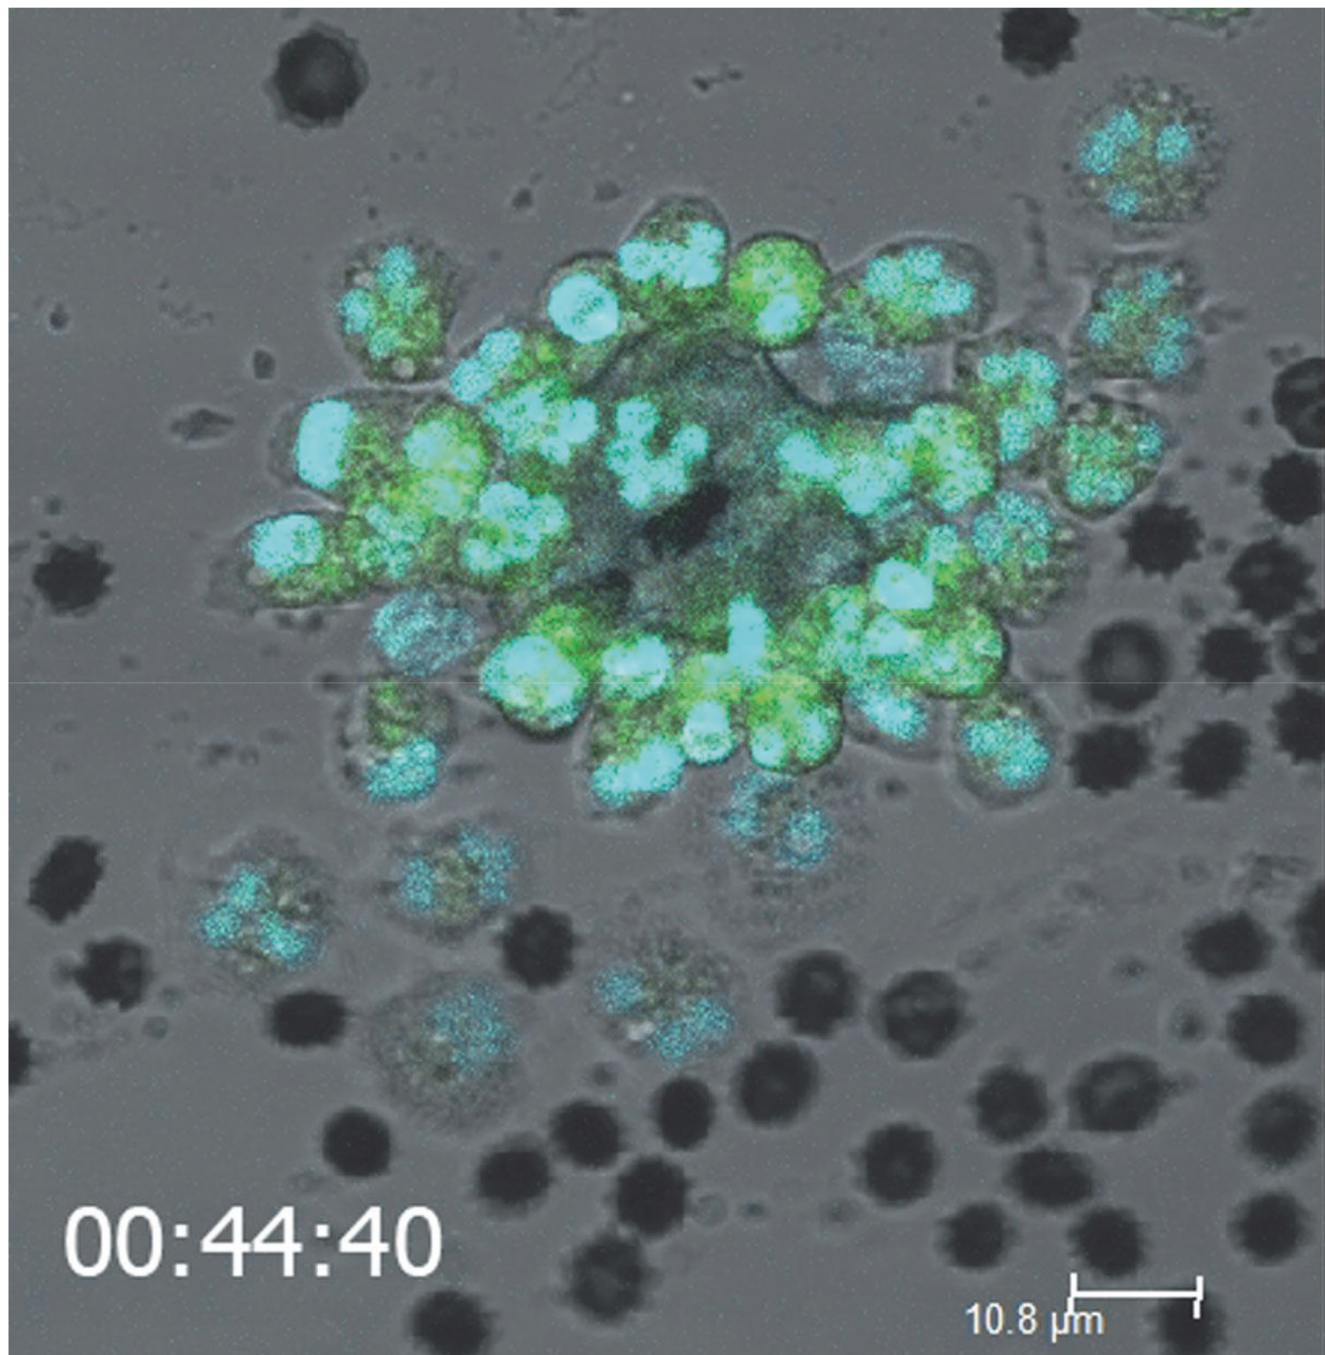

Fig. S2. Neutrophils interact with a foreign particle (larger scale). Blue indicates DNA in neutrophils' nuclei (Hoechst 33342 is used), green indicates HOCl generation (Celestine Blue is used). Black little cells without nuclei are erythrocytes.
